PRECAST TECHNOLOGY

**We produce all kinds of spare and wear parts for
concrete extruder machines.**

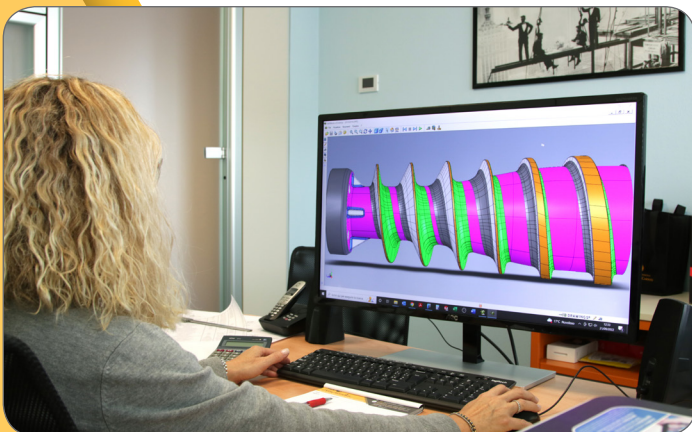

TECHNICAL SUPPORT • SALES • OVERHAUL • MAINTENANCE

SPECIALIZED IN HIGH QUALITY EXTRUDER SPARE PARTS AND PRECAST TECHNOLOGY

FLEXIBLE SOLUTIONS FOR ANY TYPE OF CONCRETE PLANTS

After twenty years' experience on all kinds of systems, we can perform maintenance and overhaul of nozzle module units, entire operating units, concrete mixing hoppers and slab saws.

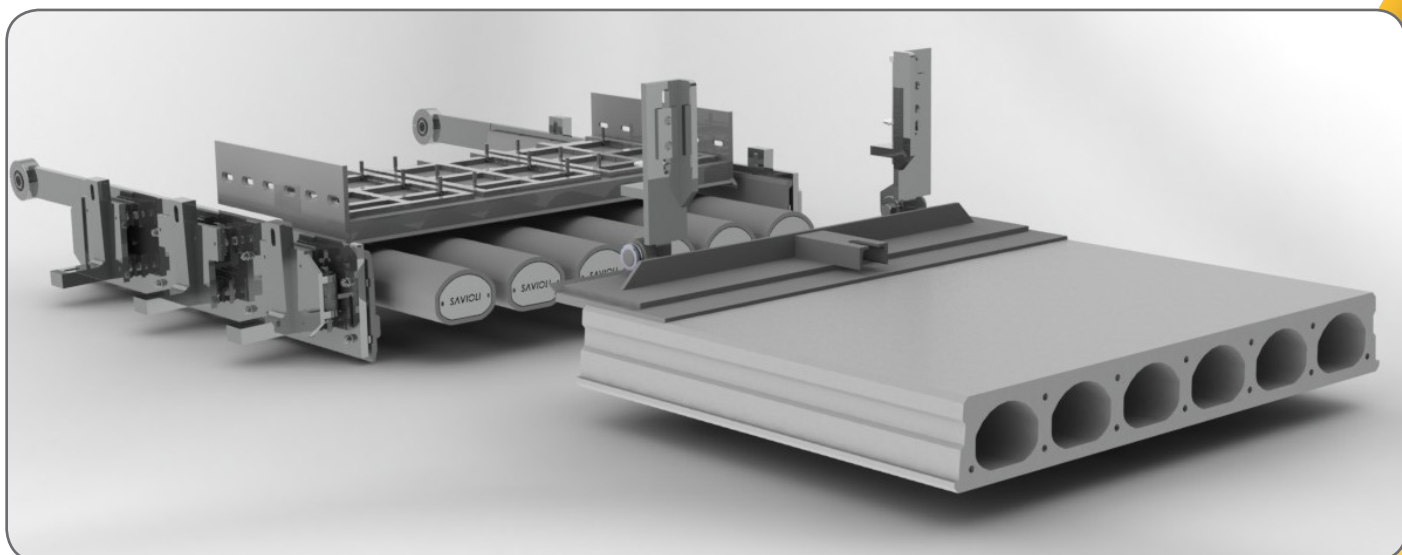

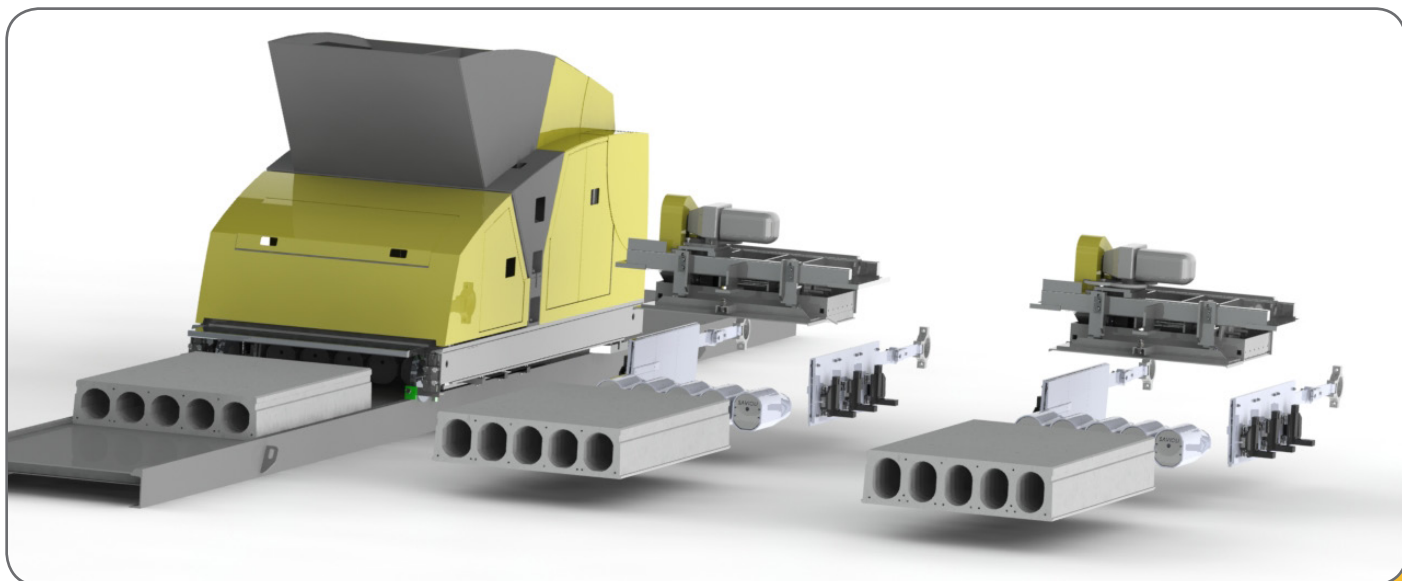

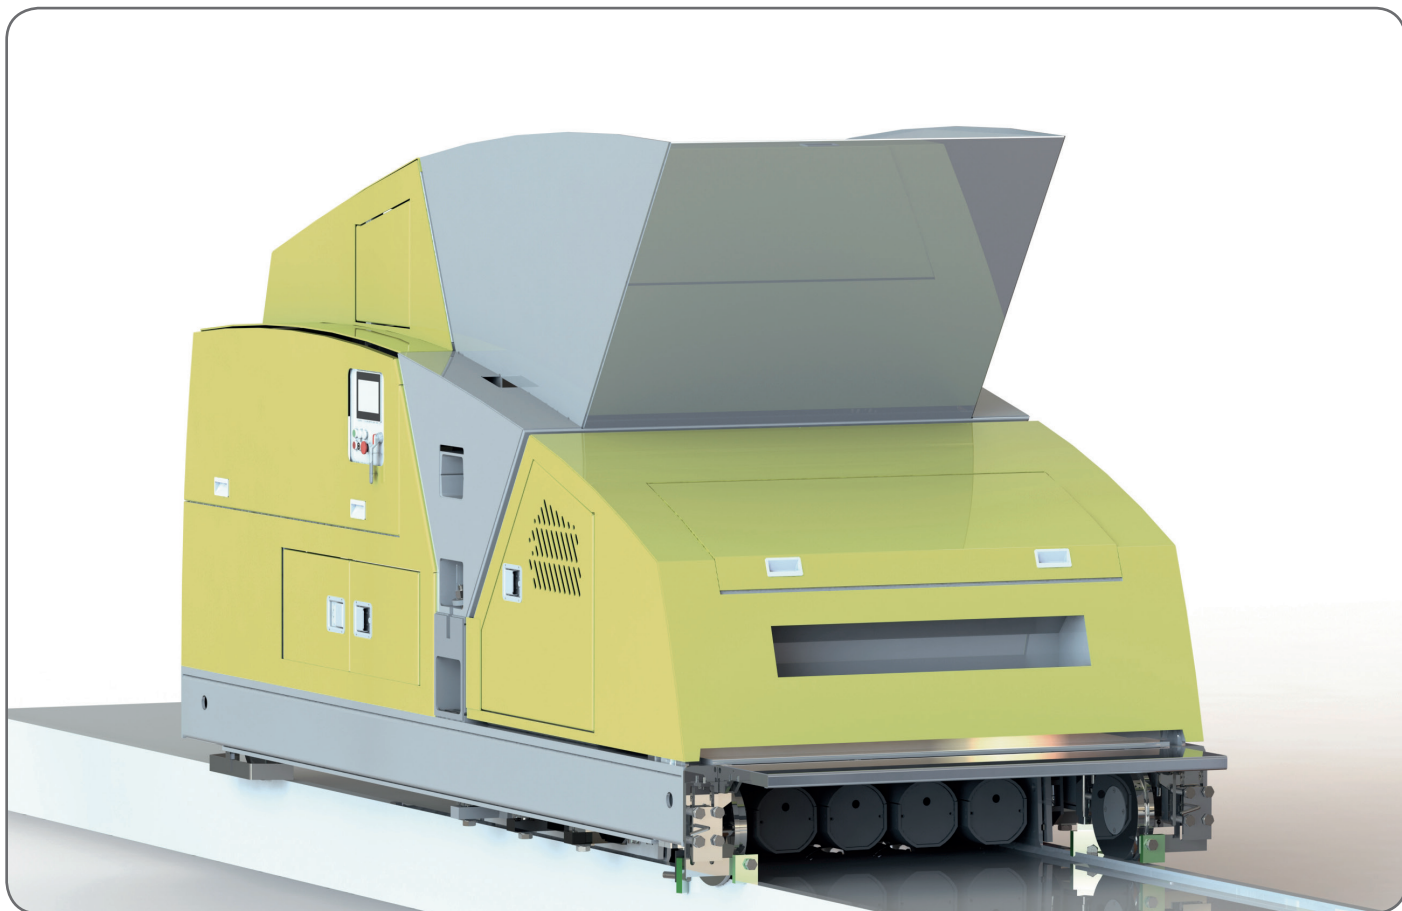

ENGINEERING DEPARTMENT

Availability and courtesy are the basis of our working relationship with customers. According to each single company's needs, our engineering department studies, designs and draws each part to meet even the smallest requirement. This department always works closely with production to find and meet any customer's requirements. This is why customer satisfaction is for us an added and essential requisite in our overall view of quality.

FACTORY AND WAREHOUSE

Spread over more than a 3700 m² indoor surface, our Company has a factory where all parts are built and repaired as well as a warehouse where we always have all parts in stock. Our flexible structure allows us to produce quantities smaller than the standard ones. This enable us to deal with orders accurately and quickly and thus reducing waiting times.
