

SINCE 1968

COMPANY PROFILE

**Precast is a fast growing
building method**

and

**it requires the right extruder
spare and wear parts**

SPECIALISED IN HIGH QUALITY EXTRUDER SPARE PARTS AND PRECAST TECHNOLOGY

Savioli Metalmeccanica is a leading company in the production of extruder wear and spare parts as well as maintenance and overhaul of precast machinery. Although we are a small Italian company, we have twenty years' experience and we are proud of our craftsman like attitude towards meeting clients' needs.

Savioli Metalmeccanica started making farming equipment parts in 1968 and since 1995 expanded into pre-cast technology

Old headquarters

New headquarters

HOLLOW CORE SLABS

Building with pre-cast is an elaborate process which requires special machinery such as extruders

extruder

We are particularly specialized in

extruder wear and spare parts

as well as **lifting equipment**

LIFTING BEAMS

LIFTING PLIERS

LIFTING CLAWS

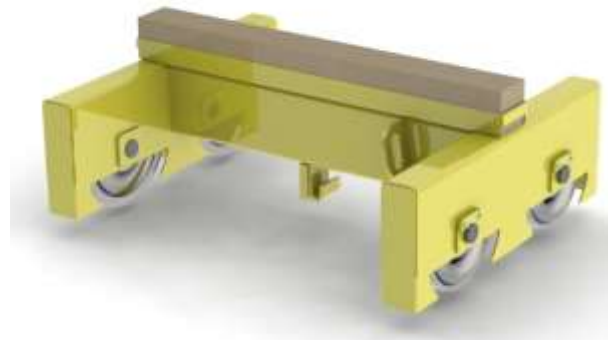

and any **other equipment** for concrete extrusion plants

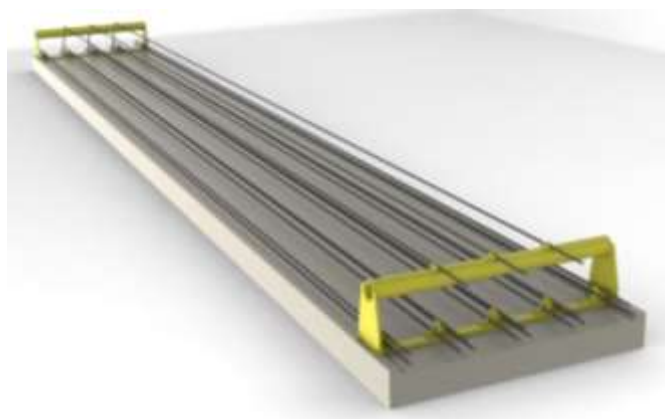

CASTING MOLDS

TROLLEY CART

UPPER ROPE GUIDES / LOWER ROPE GUIDES

But we also try to meet the needs of pre-cast factories around the world by providing maintenance and overhaul of hollow core slabs production machinery and other precast machinery
